

Fuel Management the Easy Way

Fuel Management Systems Integrated into the Bennett 3000 Series Cabinet

- Bennett's integrated fuel management solutions lower initial investment cost, conserve island space, eliminate conduits, wiring, and the necessity of disturbing possible "hot soil".
- Available for both commercial (volume only displays) and retail (money & volume displays) dispensers.
- Available in single or dual, suction or remote models, the Bennett 3000 series models exemplify our "Simply Better" mantra by saving you money and providing a technically superior solution to fuel management logistics.

Invest in Fuel Management Technology...
Instead of Cabinetry, Conduits and Wiring.

Fuel Management the Easy Way

For even greater user convenience and lower cost of ownership, consider Bennett's high hose style cabinets—the industry's only high hose style commercial dispenser.

These models are an attractive alternative to traditional low hose style cabinets that rely on post mounted, spring rewind hose retractor systems. Eliminate the maintenance cost and hassle of separate hose retractor systems and extend the life of your hoses and nozzles by choosing Bennett high hose style dispensers.

Simply Better

Bennett 3000 Series Commercial and Retail Fuel Dispensers are "Simply Better", especially when coupled with technology from innovative, leading manufacturers of fuel management systems.

Significant Cost Savings

By integrating the fuel management system (FMS) into the dispenser a significant cost savings is realized by eliminating the cabinetry associated with the FMS. Buy technology; not sheet metal, conduits, and wiring.

Interfaces Certified by Bennett

Four systems have been certified for use in the Bennett dispenser: eFueling Technologies—Fuel Guard FMS E. J. Ward, Inc.—XT system Multiforce System Corp.—Exacta Fuel Controller Trak Engineering Inc.—SentryGOLD COMPACT A fifth system from Syn-Tech Systems, Inc., the manufacturer of the FuelMaster line of products will be available soon.

Combined Product and Help Desk Support

Bennett technical help desk and the FMS help desk work together to troubleshoot any service issues that may arise. The combined support groups are focused on solutions for you and will jointly accept responsibility to rapidly correct any service issues.
