

Need to Know

Distribution To: Bennett Distributors & Service Representatives

Subject: TMS Console Compatibility

The TMS 800F (Bennett model 405M) console is compatible with mechanical dispensers using reed switch pulsers such as those made by Veeder-Root. The TMS 800F is not compatible with any Bennett electronic dispensers.

The TMS MPC (Bennett model 405E) console is compatible with all recent generations of Bennett electronic dispensers.

Customers who are using TMS 800F (Bennett 405M) with their mechanical dispensers and desire to upgrade their dispensers to electronic models, must replace the TMS 800F with a TMS MPC console.

TMS 800F for mechanical dispensers

TMS MPC for electronic dispensers
